PORTFOLIO PERSPECTIVES — NOVEMBER 2026

The pace changed, the demand did not.

Why the November 5 sell-off hit the pace of AI building, not the demand for it, and what would change our view.

Anshul Sharma
Chief Investment Officer, Savvy Wealth

Core driver

The pace changed, the demand did not. October’s flat S&P 500 hid a rotation out of the largest technology names, and the November 5 sell-off hit the same crowded trade. Earnings, not price, set our views, so the book is unchanged.

What changed this month

No trades this month.

Our view is unchanged and the book carries forward.

Savvy

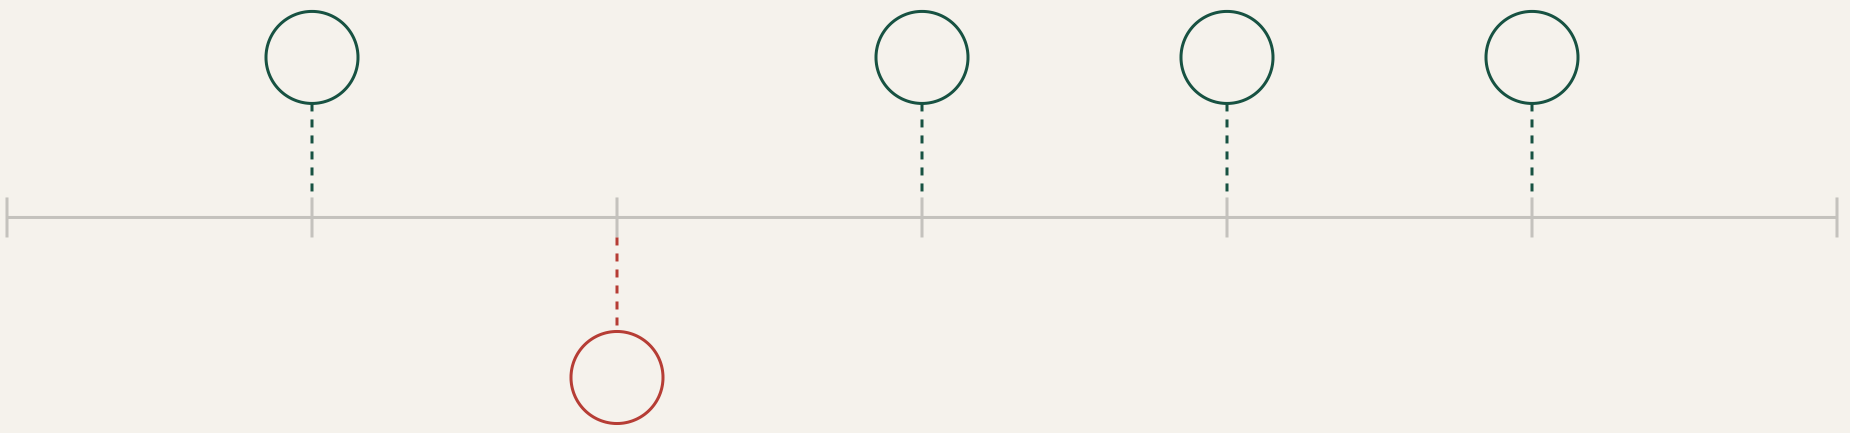

Where we stand

ASSET CLASSES

- ▲ Slight overweight Equities
- ▼ Underweight Fixed income
- ▲ Slight overweight Alternatives (commodities and gold)

SECTORS

- ▲ Overweight Technology
- ▲ Overweight Utilities

Savvy

◎ The numbers

3.2%

Current-quarter growth nowcast, still above trend

0.46pp

What stocks pay over a 10-year Treasury, back above zero

2.16 hikes

Quarter-point hikes priced through 2027, down from 3.60 a month ago

→

Savvy

Question of the month

“If AI stocks sold off, why are you still overweight technology?”

Because estimates,
not price, set the view.

Savvy

What we're watching

- Tighter credit slows growth or AI spending
- Earnings estimates roll over
- Yields rebound with the Fed
- Data-center policy slows AI building
